

Name: _____

Familiarisation task: Making fractions

1. Think of a fraction. Make the fraction in Fractions Lab as a number line, rectangle, set and jug. Do this by selecting each representation and then using the arrows to make the denominator and numerator.

2. Write down what is the same and what is different about each representation.

3. Right mouse click on one of the fractions. Change its colour:

4. Right mouse click on another fraction. Copy it:

5. Right mouse click on your preferred fraction representation. Highlight it.

6. Take a snapshot of your screen using the  button. Save the snapshot in your own folder.
